Protection You Can Count On

Aircraft hangars require the highest level of engineered fire protection to safeguard lives and property. Hiller offers customized, turnkey solutions for both commercial and military/government hangars, ensuring compliance with UFC specifications and NFPA 409 for design and installation. Our designs include the appropriate equipment and products to promote stability in each and every system.

Turnkey Solutions

- ▶ Fire Alarms
- ▶ Fire Sprinklers
- ▶ Foam Fire Suppression
- ▶ Detection and Controls
- ▶ Mass Notification

Foam Fire Suppression

As a distributor of Ansul® and Chemguard products, Hiller provides the highest level of design, installation and service of both high and low expansion foam systems.

Intelligent and Conventional Detection and Control Systems

Our strong relationships with Notifier and our exclusive direct distribution status with Det-Tronics allow us to offer competitive pricing as well as access to top-level design for detection and controls for hangars in the U.S.

Mass Notification Systems

Mass notification systems are required by UFC specifications for military and government aircraft hangars. Though these systems are not required for commercial hangars, they are often necessary to ensure the safety of the facility. Hiller offers a range of systems by Ansul®, Kidde, Notifier and Fike.
