Fire Extinguishers

Full Service Protection

Founded in 1919, The Hiller Companies is a full service fire protection and security provider. Our top priority is providing you with peace of mind knowing that the facility your residents call home is well protected. As those needing more support often move into assisted living facilities, staff at facilities like yours should have only one concern: providing for the health and wellbeing of the residents. They should not have to worry about the fire protection of the building itself. Hiller offers that sense of security.

From design and installation to inspection, service and monitoring, Hiller provides an extensive range of offerings to assisted living facilities for the protection of your residents, employees and the property. These offerings can be customized to fit your specific needs as well as meet the compliance standards of the Centers for Medicare and Medicaid Services, The Joint Commission, the National Fire Protection Association, Det Norske Veritas, and other state and local healthcare facilities accreditation programs.

As of July 5, 2016, healthcare facilities governed by Centers for Medicare and Medicaid Services and The Joint Commission must comply with the 2012 editions of the Life Safety Code (NFPA 101) and the Health Care Facilities Code (NFPA 99). If you are uncertain if you meet these requirements, please contact us for further information.

Our services include:
