

# YOUR RESOURCE FOR TOTAL PROTECTION

# Full Service Protection

Clean agent systems suppress fires rapidly without causing further property damage. They are safe for normally occupied spaces and make an excellent choice for protection of computer / server rooms, support areas and any other mission critical electronic / electrical hazards you may have in your facility. Clean agent fire suppression systems prepare you for the most critical stage of a fire – the first two minutes.

The Hiller Companies provides engineered solutions with a wide variety of clean agents and other fire protection solutions, including technically advanced detection and control products.

**HAZARD ANALYSIS | DESIGN | INSTALLATION | COMMISSIONING | INSPECTIONS | SERVICE**

## ASSOCIATED HAZARDS:

- ▶ Anechoic Chambers
- ▶ Electronic Data Processing Facilities
- ▶ Information Technology (IT) Centers / Server Rooms
- ▶ I & E Control Centers
- ▶ Telecommunications
- ▶ Hospitals and MRI Facilities
- ▶ Control Rooms
- ▶ Data Storage
- ▶ File Storage
- ▶ Print Rooms
- ▶ Performance Optimized Data (POD) Centers
- ▶ NOC Rooms
- ▶ Hot and Cold Aisle Configurations
- ▶ UPS / Electrical / Battery Rooms
- ▶ Government / Military
- ▶ Institutional
- ▶ Financial
- ▶ Museum / Historical Facilities

## OUR SERVICES INCLUDE:

### Clean Agent Fire Suppression Products

- ▶ 3M™ Novec™ 1230 Fire Protection Fluid<sup>1</sup>
- ▶ Chemours™ FM-200™ Fire Suppressant<sup>2</sup>
- ▶ Inert Gaseous Systems including IG-55, IG-100 and IG-541

### Intelligent and Conventional Control Systems

- ▶ Distributor of all major brands

### Custom Engineering and Design

- ▶ NICET-certified, Factory-trained Design Engineers

### Air Sampling Detection Systems

- ▶ VESDA from Xtralis
- ▶ Kidde Fire Systems

### Turnkey Installation

- ▶ Experienced Installation Staff
- ▶ Electrical & Mechanical Installations

### System Integration

- ▶ Facility Management Systems
- ▶ Building Fire Alarm
- ▶ Remote Monitoring

### Field Services

- ▶ Installation
- ▶ Engineering & Hazard Analysis
- ▶ Testing
- ▶ Maintenance
- ▶ Commissioning
- ▶ Recharge & Repair
- ▶ Inspections
