

## Hiller's Mission

The Hiller Companies offers fire protection systems and life safety products and services all around the world. Headquartered in Mobile, Alabama, Hiller extends its reach globally as well as in domestic markets with offices across the United States. For more than 100 years, we have been laser-focused on one goal – making the world a safer place. We accomplish that goal by protecting the lives, property and assets of our customers. Our team also strives to reduce downtime for each and every client to avoid increased risk and decreased revenue. We are proud to be on the forefront of technology and innovation by creating adaptable safety solutions. As we continue to grow and expand our life safety footprint, we pledge to keep our customers top of mind while striving to design, install and service the most compliant, reliable systems available.

**ANYTIME.  
ANYWHERE.**

Hiller has branches nationwide,  
but we are not limited by location.

We go to the job site. Our team  
services mines anytime and  
anywhere by setting up an on-site  
shop or working out of our trucks.  
Having a 24-hour, fully-equipped  
mobile fleet affords our customers  
the satisfaction of knowing their  
equipment is fully serviced and  
available for duty.

**MINES  
NEVER SLEEP.  
AND NEITHER  
DO WE.**

**Comprehensive Fire Protection  
in the Toughest Environments**

### Core Values

Our core values drive us to provide the highest quality of life safety fire protection available. This is accomplished through our quality products, training, NFPA and MSHA compliance, mining expertise, competitive pricing and safety procedures. We consistently deliver results that solidify our long-term relationships, create satisfied clients, and repeat business.

### Training

Our team consists of life safety experts who stand second to none. We support our customers with experienced factory-trained technicians and assist in training the local safety and first responder groups to identify hazards.

### Safety

Safety is our top priority. Our installation and service crew are trained in OSHA and MSHA. We employ safety specialists dedicated to ensuring safety for all parties.

### Risk Management

Our highly skilled team performs risk assessments to identify threats to people, property and production. We also make recommendations based on code requirements and best practices. Our Quality Control Department is responsible for ensuring that technicians conduct installations and inspections in accordance with applicable codes and AHJ requirements.

### Service

We are dedicated to mining. Whether we are servicing large operations requiring full-time support or small operations needing semi-annual service, we understand the hazards, safety requirements and MSHA compliance specifications. This allows us to customize plans to reduce risks for our clients.

### Capabilities

- ▶ Off-Road & Vehicle Systems
- ▶ Fire Extinguishers
- ▶ Wet / Dry / Preaction Fire Sprinkler Systems
- ▶ Fire Alarm Systems
- ▶ Mass Notification Voice Evacuation Systems
- ▶ Air Sampling Smoke Detection for Harsh Environments
- ▶ Water Mist Systems
- ▶ Fire Pumps
- ▶ Fire Hydrants
- ▶ Backflow Preventers
- ▶ Clean Agent Systems / Special Hazard Systems
- ▶ Industrial Dry Chemical Systems
- ▶ CO2 Systems
- ▶ Foam Systems
