

YOUR RESOURCE FOR TOTAL PROTECTION

Full Service Protection

In most buildings, the greatest risk of loss occurs when the facility is unoccupied. If there is a fire or security alarm and no one is on the scene to respond, significant loss can occur. The fire can spread and cause irretrievable damage; intruders can steal thousands of dollars worth of property, or commit vandalism in the process.

This is where The Hiller Companies steps in, by providing UL alarm monitoring as a measure of security to protect your assets. Alarm system monitoring reports a security or fire alarm to a remotely located UL listed central station. This station is operated 24/7 by experienced staff, specially trained in the monitoring of residential, commercial, medical and environmental security.

OUR SERVICES INCLUDE:

General Services

- ▶ Install & Service
