

SAFEGUARD WITH CONFIDENCE, PARTNER WITH HILLER

The Hiller Companies offers fire protection and life safety solutions that have been preserving lives and property worldwide for over 100 years. As a full-service provider with over 30 locations across the United States, Hiller is laser-focused on one goal – making the world a safer place. The Hiller team of experts has extensive knowledge in special hazards, energy storage systems, marine applications and more. We are proud to be at the

forefront of technology and innovation by creating adaptable safety solutions and offering a wide range of services, including design, installation, inspection and maintenance of fire protection and life safety systems. With a commitment to safety and quality, Hiller is a trusted partner for businesses and organizations of all sizes. Visit HillerFire.com to learn how we can help protect your assets and ensure compliance with industry standards.

Why Hiller

Because of our longevity, you can rely on our depth of knowledge and experience. We have perfected a tried and true process to ensure a smooth transition throughout the development and maintenance of your fire protection systems, with safety for all as our top priority. From design, installation and commissioning to customer training, inspection, repair and upgrades, our fire protection engineers provide guidance throughout the process. When safety matters, experience the Hiller Difference.

Portable Fire Extinguisher Inspection Meeting NFPA 10 Requirements

Our expert technicians provide complete fire extinguisher inspection services to meet the requirements of NFPA 10, Standard for Portable Fire Extinguishers. Key elements of our inspections include:

- ▶ Annual visual inspection of all extinguishers to check for damage, corrosion, leakage or clogged nozzles. Verification that tamper seals are intact.
- ▶ Monthly quick-check of extinguishers to confirm they are in designated locations and have proper pressure.
- ▶ Periodic, thorough examinations involving a complete physical inspection of extinguisher components. This is conducted every 5, 6 or 12 years based on extinguisher type.
- ▶ Annual weight inspections of CO2 extinguishers to verify full charge.
- ▶ Six-year maintenance involving discharging and recharging extinguishers as required by extinguisher type.
- ▶ Hydrostatic testing of extinguisher cylinders at intervals between 5 and 12 years.

At Hiller, we provide inspection tags with the date and sign-off initials for each inspected extinguisher. Our technicians are certified in the inspection, maintenance and recharging all fire extinguisher types. We maintain replacement stock to swap out any deficient extinguishers immediately. Contact us today to schedule your expert NFPA 10 fire extinguisher inspections at hillerfire.com/request-service.
