

YOUR RESOURCE FOR TOTAL PROTECTION

Full Service Protection

Power generation machinery, such as turbines, transformers, hydro- and wind-powered systems, and nuclear reactors, are built to operate continuously to utilize the full potential of the equipment. This requires reliable and effective fire protection systems to ensure minimal disruption should a fire occur.

As an ISNetworld-certified contractor, The Hiller Companies specializes in providing customized solutions for fire detection and suppression. In an industry as diverse as power generation, every hazard is unique. So every hazard prevention tactic must be unique as well. Our experienced engineers and technicians will seamlessly manage the engineering, design, installation, service and monitoring of your fire protection system to meet local and national regulations.

Inspection and maintenance services are performed in accordance with outage schedules.
