Teekay Emergency Tool Kit Saves You Downtime, Money And Frustration

One of the most important goals when working in the water and wastewater sector is to avoid downtime. Being taken off mission due to broken or damaged pipes can derail your work, cost thousands of dollars and add frustration to your crew's morale. The Hiller Companies has a solution: Teekay Emergency Tool Kits.

What is a Teekay Emergency Tool Kit?

Our Teekay Emergency Tool Kits provide repair couplings of various sizes customized to your needs in addition to all of the tools you will need to install the couplings on the spot. When pipes spring a leak and you need a quick fix, look no further than our hinged couplings. These repair couplings can act as a permanent fix or a temporary solution to keep you on mission until the plant is next upgraded.

Why Do You Need a Teekay Emergency Tool Kit?

- ▶ **Saves Time** – Our kit allows you to conduct repairs on the spot while the system is in use. Our couplings are so easy to install, any one person at the treatment plant can do it. You can stay on mission and maintain operational capabilities.
- ▶ **Saves Money** – Without our repair kit, you would need to send welders and pipe fitters to the pipeline for repair if you are stranded. You could spend days trying to find suitably qualified and trained personnel to send to the treatment plant losing valuable time and money. Our couplings help you stay on time, on mission and on budget.
- ▶ **Custom Couplings** – Each kit is custom designed to provide the size and number of couplings you anticipate needing in an emergency situation. Everything from the tools, the couplings, installation instructions, and the cases are customized for your specific requirements. Cases range from camera case size to ice chest size.

Applicable Standards and Approvals

- ▶ NSF 61 approved for use with drinking water (EPDM sealing gaskets)
- ▶ AWWA C227-17
- ▶ ASTM F1476
