

Unlocking the Future of Energy Storage System Safety

At The Hiller Companies, we take pride in our position as industry leaders in Energy Storage Systems (ESS) safety. Our commitment to innovation, code compliance safety, and comprehensive solutions sets us apart, making us the partner of choice for organizations seeking to harness the power of cutting-edge technologies. Here's why The Hiller Companies is your definitive choice for ESS safety compliance:

1. Shaping Industry Standards: National Fire Protection Association (NFPA) 855 Committee Leadership

As active contributors to the NFPA 855 Committee, we go beyond industry norms. Our ESS experts lead multiple task groups, positioning us to help lead the NFPA 855 code in the next cycle. This vantage point allows us to offer unparalleled insight into industry trends well ahead of code adoption, giving your projects a strategic advantage.

- ▶ Task Chair for Multiple Task Groups
- ▶ Continue to provide leadership to NFPA 855 through the Next Cycle
- ▶ Influence Safety and Battery Energy Storage Systems (BESS) Policy
- ▶ Relationships with Manufacturers, Integrators, Owners/Operators, Authority Having Jurisdiction (AHJ's) and EPCs

2. Extensive Network Across the Value Chain

Our relationships span the entire ESS value chain, with hundreds of Non-Disclosure Agreements (NDAs) in place. These NDAs cover integrators, customers, and manufacturers at various stages of the value chain, providing us with exclusive access and insights into invaluable industry data.

- ▶ Hundreds of NDAs Across the Value Chain
- ▶ An exclusive path into the Industry Failures and Large-Scale Testing
- ▶ Access to industry best practices and engagement for setting best practices

Unlocking the Future of Energy Storage System Safety

3. End-to-End Provider with a Holistic Approach to Safety

As a full-service provider, we cover every aspect of your ESS project. With a successful track record of hundreds of completed projects in the past 5 years, we provide comprehensive solutions that prioritize safety and efficiency. Working with a trusted team of partners, we can deliver end-to-end solutions.

- ▶ Full Service Comprehensive ESS Solutions
- ▶ Hundreds of Completed BESS Projects totaling 10+ GWh in the Last 5 Years
- ▶ Support from Educated Project Managers and Account Managers

4. Trusted Technical Advisor and Solution Provider with a Strong Track Record

The Hiller Companies is not just a service provider but a solution provider. We are your trusted technical advisors that will provide application-specific solutions. Our team comprises experts with a proven track record, offering guidance that goes beyond industry standards. With former AHJs, such as fire marshals, on staff, we bring a unique perspective to ensure your project's success.

- ▶ Trusted Technical Advisor
- ▶ Former AHJs on Staff
- ▶ Strong Track Record of Safety and Efficiency

Choose The Hiller Companies for a Future-Proof ESS Solution

By choosing The Hiller Companies, you're not just selecting an industry leader in BESS but also choosing a pioneer committed to innovation, safety, and comprehensive solutions. As active contributors to the NFPA 855 Committee, we shape industry standards and lead task groups, providing strategic insights ahead of code adoption. Our extensive network, backed by numerous Non-Disclosure Agreements, grants exclusive access to industry data, facilitating end-to-end solutions with a holistic safety approach. Serving as trusted technical advisors, our team, including former AHJs, ensures application-specific solutions and a proven track record of safety and efficiency. Partner with us to unlock the future of energy storage and elevate your projects with cutting-edge technologies.
