

EXPERTISE YOU CAN COUNT ON

Specialized Protection for High-Risk Environments

The toughest environments don't faze us. We at Hiller provide fire protection and life safety products and services that preserve lives and property worldwide – any time, anywhere.

Marine / Offshore

As one of the most trusted and tenured marine and offshore fire protection companies in the U.S., our experienced engineers and technicians seamlessly manage the design, engineering, installation, service and maintenance of your customized fire detection and suppression systems both in port and at sea.

Military/Defense

Protecting those who protect us is a great honor. Our dedicated team provides top-tier fire protection solutions that comply with stringent Unified Facilities Criteria (UFC), ensuring the utmost safety and security.

Energy Storage Systems and Power-Gen Services

Energy Storage Systems (ESS) utilizing lithium-ion (Li-ion) batteries are the primary infrastructure for wind turbine farms, solar farms, and peak shaving facilities where the electrical grid is overburdened and cannot support the peak demands. Hiller has the design experience and the technical understanding to provide the proper equipment for a turnkey solution. We can analyze your risk and understand the upcoming NFPA 855 Code and other codes including, UL 9540, California CFC 608 and IFC Chapter 12.

We also protect the power generation industry including power plants, gas turbines, and generator rooms with custom fire protection solutions to meet your unique circumstances.

Special Hazards

Our special hazards fire protection systems and services are designed to detect and suppress fires in environments where traditional sprinkler systems are ineffective or may cause damage to sensitive equipment or materials. These state-of-the-art systems are crucial for protecting high-value assets and critical infrastructure and ensuring the safety of personnel in specialized hazardous environments.

Mining

Hiller has branches nationwide, but we are not limited by location. We go to the job site. Our team services mines anytime and anywhere by setting up an on-site shop or working out of trucks. Our 24-hour, fully equipped mobile fleet affords our customers the satisfaction of knowing their equipment is fully serviced and available for duty.

Industrial

Industrial facilities often house hazardous materials, complex machinery, and high-risk processes. We specialize in providing tailored fire protection solutions to ensure the safety of your employees, minimizing downtime, and protecting your valuable assets.

Services:

- ▶ Gaseous Fire Suppression Systems
- ▶ Clean Agent Systems (total flood only)
- ▶ Water Mist Fire Suppression Systems
- ▶ Detection and Alarm Systems
- ▶ Galley Fire Suppression Systems
- ▶ AFFF and Dry Chemical Deck Systems
- ▶ FiFi Systems
- ▶ Helideck Foam Systems
- ▶ Fire Sprinkler Systems
- ▶ Fire Risk Assessment and Consulting
- ▶ Installation and Maintenance of Fire Suppression Systems
- ▶ Emergency Response Planning and Training
- ▶ Compliance Audits and Code Adherence
- ▶ Consultation (Site Specific or Best Practices)
- ▶ Pre-Incident Planning
- ▶ Design
- ▶ Pre-Installation Review (Site Survey)
- ▶ Integration – Existing and New Systems
- ▶ Decommissioning/ Commissioning
- ▶ Explosion/Fire Modeling/ Deflag and Vent Calcs
- ▶ Emergency Response Planning
- ▶ Inspection and Testing
- ▶ Training and Education
- ▶ Off-Road & Vehicle Systems
- ▶ Mass Notification Voice Evacuation Systems
- ▶ Air Sampling Smoke Detection for Harsh Environments
- ▶ Fire Pumps
- ▶ Fire Hydrants
- ▶ Backflow Preventers
- ▶ Fire alarm system design, installation, repair and monitoring
- ▶ Fire sprinkler system design, installation, repair and inspection
- ▶ Specialized fire suppression system installation and maintenance
- ▶ Emergency lighting and exit sign installation and repair
- ▶ Fire extinguisher supply, inspection, repair and training
- ▶ Fire safety planning and emergency preparedness training
- ▶ Central Station Monitoring – not only fire alarms but also areas of refuge, access control, elevators, and more.
