## Optimal Protection. Minimal Downtime.

Founded in 1919, The Hiller Companies is a full service fire protection and security provider. Our mission is to minimize your downtime while protecting your assets. In order to provide the safest and most efficient fire protection for your marine or industrial applications, Hiller is a proud distributor, supplier and partner of Securiplex, a proven innovator and pioneer with the first FM-approved water mist fire protection system in North America. Tested at U.S. government laboratories, the Securiplex water mist system extinguishes fires faster than all other major competitors.

Our team of engineers and specialists will design the most cost-effective solution without compromising protection of your people, equipment or property.

Approved for marine, offshore, commercial and industrial applications, water mist protection systems require a fraction of the water used by conventional sprinklers and are well suited for the protection of a wide range of hazards. Reduced post-discharge damage and clean up as well as simple recharge provide for less downtime, while clean and green technology poses no risk to your crew and assets.

### BENEFITS OF WATER MIST SYSTEMS

- ▶ Up to 90% less water than conventional sprinkler systems
- ▶ Significant and rapid temperature reduction
- ▶ No downtime for recharge
- ▶ Virtually unlimited discharge time if water is available
- ▶ Water is essentially a zero cost extinguishing agent
- ▶ Easy installation
- ▶ Smaller piping/tubing requirements
- ▶ Scrubbing of smoke and toxic gases
- ▶ Increased personnel safety
- ▶ Dramatic reduction in collateral damage to the facility and equipment

### APPLICATIONS ACROSS MULTIPLE PLATFORMS

- ▶ Industrial
  - Turbines
  - Generators
  - Transformers
  - Hydraulics
- ▶ Commercial
  - Office Spaces
  - Hospitals
  - Data Centers
  - Museums
  - Cultural Heritage
- ▶ Transportation
  - Mass Transit
  - Tunnels
  - Aircraft Hangers
- ▶ Marine & Offshore
  - Military Vessels
  - Commercial Vessels
  - Platform Supply Vessels
  - Offshore Oil Rigs
